

In the Claims:

Please amend Claims 1 and 18, and add new claims 23 and 24. This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (currently amended) A tabletop game, comprising:
a playing surface;
a sidewall surrounding at least a portion of the playing surface;
the playing surface comprising a base and a highly light reflective surface coupled to the base;
the highly light reflective surface comprising a design; and
an upper light source arranged above the highly light reflective surface, such that light from the light source illuminates the design in the highly light reflective surface.
2. (previously presented) The game according to claim 1, wherein the design comprises placing non-reflective material on the playing surface.
3. (original) The game according to claim 1, wherein the design simulates at least one of a hockey rink, a basketball court, a football field, and a soccer field.
4. (cancelled)
5. (original) The game according to claim 1, wherein the reflective surface has at least one portion with a first reflectivity and at least one portion with a second reflectivity and the first reflectivity and the second reflectivity are different.
6. (previously presented) The game according to claim 1, wherein the reflective surface comprises a plurality of noncontiguous reflective surfaces coupled to the base.
7. (original) The game according to claim 6, wherein the playing surface further comprises at least one light transmissive portion.
8. (original) The game according to claim 1, wherein the light reflective surface reflects light over a majority of the playing surface.
- 9-17. (cancelled)
18. (currently amended) A tabletop game, comprising:
a playing surface;

means for brightening the playing surface, wherein the means for brightening includes a highly light reflective layer; and

a design in the playing surface, wherein the means for brightening the playing surface ~~for~~ brightens the design.

19. (cancelled)

20. (currently amended) The game according to claim 18, wherein the means brightening the playing surface includes the highly a reflective layer selected from a group of layers consisting of: a mirrored layer and a bike reflector layer.

21-22. (cancelled)

23. (new) The game according to claim 1, wherein the highly light reflective surface comprises a mirror.

24. (new) The game according to claim 1, wherein the highly light reflective surface comprises a bike reflector material.
